# Wash-Away Iron-On Ink Jet Transfer Paper Instructions

Wash-Away transfer paper is a transparent base material to be used on white or very light color fabrics. Print "reverse" or "mirror image" from your computer ink jet printer to create your own personalized Wash-Away projects. **For optimal results, please read instructions carefully prior to use.**

## 1. MATERIALS NEEDED

- Wash-Away Transfer Paper (included in the package).
- T-shirt, garment or other project on which to apply the Wash-Away transfer. Works best with 100% cotton and polyester / cotton blends.
- Computer color ink jet printer.
- Ordinary household hand iron.
- Pillowcase.
- Smooth, hard, heat resistant surface, such as a wood cutting board for ironing. Do not use ironing board, glass or heat sensitive surfaces.

## 2. CREATE YOUR IMAGE

- Design your image on the computer using your own photos, graphics and / or text.
- "Mirror image" before you print. This may also be referred to as "flip / horizontal" in your computer program's tools. Many printers offer "mirror image," "t-shirt mode" or "reverse mode" in the printer settings options.
- If so desired, test print your image on a plain piece of paper.
- Insert a single sheet of Wash-Away transfer paper into your printer so that printing occurs on the plain, unmarked side of the transfer sheet.
- Printer should be set at best quality, plain paper. Print image.
- Allow image to dry 30 minutes before transferring.
- Using scissors or craft knife, trim image to desired shape.

## 3. IRON APPLICATION

- Preheat iron to highest (cotton) setting. **DO NOT USE STEAM.** (Empty any water that may be in iron. Allow iron to preheat for five minutes.)
- Place pillowcase on smooth, hard, heat resistant ironing surface such as a wood cutting board. Do not use ironing board. Iron pillowcase, if necessary, to remove wrinkles.
- Pre-iron t-shirt or garment to remove any moisture and wrinkles.
- Position transfer image side **DOWN** on project surface.
- Using firm pressure, slowly iron over the entire transfer in a circular motion making sure that each spot of the transfer, especially edges, receives 15 to 20 seconds of heat.
- Peel cold only; wait for the transfer to cool for at least two minutes and then remove the backing paper using a smooth even motion. If you would like to transfer several images on one project, it is recommended that you wait until all images are ironed before peeling away any of the paper so that the heat of the iron does not affect previously transferred images.

## 4. LAUNDERING INSTRUCTIONS

**NOTE:** Laundering **WILL** remove the transfer from the garment

- Machine wash separately according to normal garment laundering instructions.

## 5. STORAGE

- Always store unused product in original package in a flat, cool, dry, place.

This product is intended for use in standard ink jet printers only. Do not use in other printers or copiers such as laser printers or any other printer / copier that applies heat, as it may damage the machine. Test the product you plan to use to determine the suitability of the product for your equipment, methods and substrate material.
